Portfolio Website: <https://uchemichael.vercel.app/>

PROFESSIONAL SUMMARY

Results-driven AI & ML Engineer with 6+ years of experience driving 30–50% efficiency gains and business transformation through scalable machine learning solutions, intelligent systems, and data analytics. Proven track record in deploying end-to-end AI solutions, optimizing workflows, and delivering actionable insights that enhance decision-making for 10+ clients across diverse industries. Expert in building automated systems, data pipelines, and predictive models that translate complex business challenges into measurable outcomes.

CORE COMPETENCIES

AI & Machine Learning

Machine Learning Engineering | Deep Learning & Neural Networks | Predictive Analytics | Model Development & Deployment | Computer Vision | Natural Language Processing (NLP) | Algorithm Optimization | MLOps

Data Analytics & Engineering

Advanced Data Analysis | Data Mining & ETL Pipelines | Statistical Modeling | Business Intelligence | Data Visualization (Power BI, Tableau) | SQL & Database Management | Big Data Processing | A/B Testing

Automation & Intelligent Systems

Process Automation (Python, RPA) | Workflow Optimization | AI-Driven Decision Systems | Task Automation & Scripting | System Integration | API Development | Cloud Computing (AWS, Azure)

Technical Stack

Programming: Python (pandas, NumPy, scikit-learn, TensorFlow, PyTorch), SQL, Java, R

Data Tools: Excel, Power BI, Tableau, Google Sheets, Jupyter, Apache Spark

ML Frameworks: TensorFlow, Keras, PyTorch, scikit-learn, XGBoost

Design & Web: HTML/CSS, React, Corel Draw, Photoshop, Responsive Web Design

Project Management: Agile/Scrum, Jira, Trello, Asana, Monday.com

Cloud & DevOps: AWS, Google Cloud, Docker, Git, CI/CD Pipelines

Business & Administrative Excellence

Strategic Planning & Consulting | Client Relationship Management | SOP Development | Proposal Writing | Executive Calendar Management | Cross-Functional Team Leadership | Stakeholder Communication

PROFESSIONAL EXPERIENCE

Senior AI & Automation Consultant | Freelance

Contract | *January 2019 – Present*

- **AI Solutions Delivery:** Designed and deployed 25+ machine learning models for predictive analytics, customer segmentation, and demand forecasting, achieving 30–50% efficiency improvements for SMEs and enterprise clients
- **Automation Engineering:** Developed Python-based automation scripts and RPA solutions that eliminated 15–20 hours of manual work weekly per client, processing 100K+ records with 98% accuracy
- **Intelligent Systems:** Built recommendation engines, sentiment analysis tools, and computer vision applications that increased client revenue by an average of 25%
- **Data Pipeline Architecture:** Engineered ETL pipelines and data integration systems handling 500K+ daily transactions, reducing data processing time by 60%
- **Business Intelligence:** Created 20+ interactive dashboards and real-time analytics platforms enabling data-driven decision-making for C-suite executives
- **Client Portfolio Management:** Managed relationships with 30+ clients across retail, healthcare, finance, and logistics sectors, maintaining 95% retention rate

Lead Data Analyst & ML Researcher

Self-Employed | *March 2019 – December 2024*

- **Advanced Analytics:** Conducted comprehensive data analysis projects involving statistical modeling, hypothesis testing, and predictive analytics for 30+ businesses, improving business insights by 35–45%
- **Machine Learning Research:** Researched and implemented cutting-edge ML algorithms for classification, regression, and clustering problems, achieving 92% average model accuracy

- **Data Quality Engineering:** Established data governance frameworks and quality assurance protocols, improving data accuracy from 75% to 97%
- **Visualization Excellence:** Designed executive dashboards tracking 50+ KPIs using Power BI and Tableau, facilitating \$2M+ in identified cost savings
- **Automation & Optimization:** Built automated reporting systems using Python (pandas, NumPy) that generated weekly insights for stakeholders, reducing report generation time by 80%
- **Strategic Consulting:** Translated complex business requirements into technical data strategies, conducting 100+ stakeholder meetings and workshops

Virtual Assistant & Project Coordinator

Self-Employed | *January 2019 – Present*

- **Executive Support:** Provided high-level administrative support to 15+ C-suite executives and entrepreneurs, managing complex calendars, email coordination, and client communications with 100% deadline adherence
- **Process Documentation:** Developed 30+ SOPs, workflow diagrams, and training materials, reducing client onboarding time by 40% and improving team productivity
- **Project Management:** Coordinated 50+ cross-functional projects using Agile methodologies, tracking deliverables via Asana/Trello, and ensuring 95% on-time delivery rate
- **Content Creation:** Drafted 100+ proposals, presentations, marketing materials, and technical documentation aligned with client branding and business objectives
- **CRM Management:** Administered CRM systems for sales pipeline tracking, customer engagement, and performance analytics, increasing conversion rates by 30%

Data Collection Specialist & Quality Assurance Analyst (Remote)

Independent Contributor | *June 2019 – Present*

- **AI Training Data Collection:** Captured and curated 10,000+ high-quality images and datasets for machine learning model training, adhering to strict quality guidelines and annotation standards
- **Field Data Operations:** Executed structured data collection tasks across diverse real-world environments, ensuring correct angles, lighting, framing, and metadata accuracy
- **Quality Control:** Implemented quality assurance protocols achieving 99% data accuracy through systematic reviews, consistency checks, and validation procedures

- **Data Annotation:** Labeled and categorized complex datasets for supervised learning projects, maintaining consistency across 50,000+ data points
- **Autonomous Execution:** Managed independent workflows with minimal supervision, adapting quickly to changing task requirements and meeting all project deadlines

Computer Instructor & Technology Trainer

Sacred Heart Computer & Vocational Centre | *March 2019 – December 2021*

- **Curriculum Development:** Designed comprehensive training programs covering software applications, digital literacy, programming fundamentals (Python, Java), and data analysis
- **Student Success:** Trained 150+ students in computer operations, achieving 95% satisfaction rate and 85% certification completion rate
- **Technical Documentation:** Authored 20+ simplified SOPs and training guides for software tools, reducing student confusion by 50% and accelerating learning curves
- **Technical Support:** Managed computer lab operations, resolved 200+ technical issues, and maintained network infrastructure supporting 50+ concurrent users
- **Program Innovation:** Introduced project-based learning modules incorporating real-world data analysis scenarios, increasing student engagement by 40%

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Federal University of Technology, Owerri | *2020 – 2025*

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Statistical Analysis, Software Engineering, Python/Java Programming, Web development.

Diploma in Computer Operations

Sacred Heart Computer & Vocational Centre | *2018*

Focus Areas: Computer Hardware/Software, Office Productivity, Digital Literacy, Graphic Designs

NOTABLE PROJECTS & ACHIEVEMENTS

AI-Powered Customer Churn Prediction System

- Developed machine learning classification model using Random Forest and XGBoost achieving 91% prediction accuracy

- Implemented early warning system that reduced customer churn by 28% for telecommunications client
- Automated data preprocessing pipeline handling 50K+ customer records monthly

Intelligent Sales Performance Analytics Dashboard

- Built comprehensive Power BI dashboard integrating 5+ data sources for real-time sales tracking and forecasting
- Enabled data-driven strategies that boosted client revenue by 20% and improved sales team efficiency by 35%
- Incorporated predictive analytics forecasting quarterly sales trends with 87% accuracy

Automated Expense Management & Reporting System

- Engineered Python-based automation solution for expense categorization, anomaly detection, and financial reporting
- Reduced manual data entry time by 90%, saving 15+ hours monthly and eliminating 95% of human errors
- Integrated with cloud storage for real-time expense tracking and budget alerts

Computer Vision Object Recognition System

- Developed CNN-based image classification model for quality control in manufacturing setting
- Achieved 94% accuracy in defect detection, reducing inspection time by 70%
- Deployed solution processing 1,000+ images daily with real-time inference

Natural Language Processing Sentiment Analysis Tool

- Built NLP model analyzing customer reviews and social media sentiment for brand reputation management
- Processed 100K+ text documents with 89% sentiment classification accuracy
- Provided actionable insights leading to 15% improvement in customer satisfaction scores

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Machine Learning Specialization (Ongoing)
- Python for Data Science & Machine Learning

- Advanced Data Analytics & Visualization
- Agile Project Management Professional
- Business Intelligence & Dashboard Design

PROFESSIONAL ATTRIBUTES

Strategic Thinker: Translates business challenges into innovative AI and data solutions

Results-Oriented: Consistently delivers 30–50% efficiency gains and measurable ROI

Autonomous Leader: Excels in independent and collaborative remote environments

Continuous Learner: Stays current with emerging AI/ML technologies and industry trends

Communication Expert: Bridges technical and non-technical stakeholders effectively

Client-Focused: Committed to exceeding expectations and building long-term partnerships

LANGUAGES

English — Native/Fluent (Professional Proficiency)

AVAILABILITY & WORK PREFERENCES

Work Style: Remote, Hybrid, or Field-Based

Availability: Full-time, Part-time, Contract, or Project-Based

Time Zone: West Africa Time (WAT) | Flexible for global collaboration

Commitment: Available for both short-term projects and long-term engagements
